Projects

Portfolio Website :-

https://tushar79821.github.io/Imagine_ink/

IMAGINEINK.com is a dynamic showcase of my work, built with HTML, CSS, and JavaScript. HTML provides the structure and content, CSS adds styling for a visually appealing design, and JavaScript enhances interactivity, creating a seamless user experience. It is a Responsive Design.

Weather App :-

https://tushar79821.github.io/weather_app/

The weather website is a user-friendly platform developed with frontend technologies like HTML, CSS, and JavaScript. It utilizes weather API to dynamically fetch and display real-time weather information.

Recipe Book :-

https://tushar79821.github.io/Recipe_book/

It is a simple page which is designed using CSS and it showcases Steps to make simple Deserts. It also uses eye pleasing CSS gradient Design

Simple Calculator :-

<https://tushar79821.github.io/Calculator/>

It is built using JS and designed using CSS. It performs basic Mathematical operations like addition, subtraction, multiplication and division.
